

NOTICE

To owners and drivers of commercial vehicles operating in Alberta

In an attempt to reduce out-of-service rates among commercial vehicles operating in the province, the Government of Alberta will be consistently applying directives regarding vehicles declared out-of-service. These directives will be in full effect **December 15, 2008**.

Defects are designated through the Commercial Vehicle Safety Alliance (CVSA) North American Standard Out-of-Service Criteria as either “require attention”, meaning it is to be corrected at the conclusion of the current trip, or as “out-of-service”, meaning the defect must be corrected before the vehicle and/or driver continues.

This includes:

- If a vehicle is placed out-of-service, an Out-of-Service Vehicle Sticker will be applied.
- Proof of repairs must be reported as directed to a peace officer before a vehicle placed out-of-service can be operated.
- Peace officers will not release vehicles and/or drivers from an out-of-service order until all repairs required by the out-of-service order have been satisfactorily completed to where a violation no longer exists.
- If, at the discretion of the officer, it is less hazardous to the public to relocate the vehicle, it shall be towed, transported, or escorted to the nearest safe location.
- Vehicles or drivers placed out-of-service will be issued a violation ticket(s) for a CVSA defect(s) at the discretion of the peace officer.

This supports the Government of Alberta’s commitment to reducing the number of traffic collisions by improving traffic safety through the Alberta Traffic Safety Plan: Saving Lives on Alberta’s Roads.

For more information contact any office of Commercial Vehicle Enforcement (to call toll free within Alberta dial 310-0000).
